**L**egalGraphicArts.com can complete all aspects of your website, from domain registration to maintenance to registering with various search engines. These steps all take time, but through our experience we are able to provide this to you at affordable prices.

Whether you are considering your first website or thinking of moving your pages from another website to your own domain, with your own website you can:

- Control the entire web content. The only restrictions are the ones you place on it.
- Create a professional appearance as a dot com, not a web page buried in another site.
- Choose a domain name that fits your needs.
- Create your site so search engines can locate it quickly and easily.
- Create a site design that matches your corporate image.
- Set up multiple mailboxes on one account, eliminating the need to share e-mail addresses.
- Update your site continuously as your company changes.
- Add and remove pages as capabilities and staff changes.

A typical law firm website might include the following items:

- Attorney photos, biographies and practice areas.
- Basic firm information including phone, fax, e-mail addresses and directions.
- Recent case successes.
- Links to various legal resources.
- Monthly newsletter for clients to download.

LegalGraphicArts.com specialize in getting web sites for law firms and attorneys up and running in order to meet your internet needs. Please call us today at 610-690-4455 or visit our website [www.LegalGraphicArts.com](http://www.LegalGraphicArts.com) for more information.
